

Quantitative Faecal Immunochemical Tests

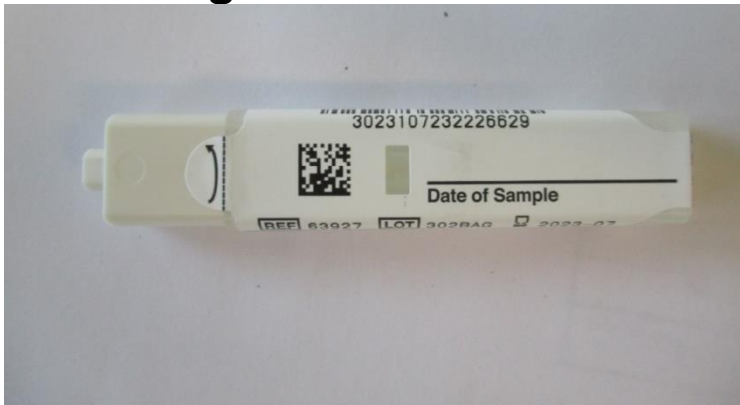

Symptomatic QFIT – blue cap

Patients with bowel symptoms should be provided with the Symptomatic QFIT test – blue cap. This should be submitted by a health professional and accompanied by the appropriate request form.

More info here : [gFIT for lower GI symptoms | Northern Ireland Cancer Network \(hscni.net\)](https://www.hscni.net/gfit-for-lower-gi-symptoms)

Screening QFIT

Patients with bowel symptoms should not be advised to contact the bowel screening helpline for a screening test. Practices should also never issue a symptomatic qFIT test kit as a replacement screening test. Any individuals who contact the practice to request a replacement screening test should be advised to contact the Freephone bowel cancer screening helpline on **0800 015 2514** and a replacement screening kit will be issued.

Only screening QFITs should be returned in the screening return envelope.
